PROFESSIONAL SUMMARY

Master of Science in Computer Science student at DePaul University with 3 years of professional software development experience. Skilled in technical troubleshooting, customer support, event coordination, and collaborative problem-solving within technology-focused environments.

EDUCATION

DePaul University <i>Master of Science in Computer Science</i>	Chicago, IL Sept. 2025 – Present
BITS Pilani, WILP <i>Postgraduate Certificate in AI/ML</i>	India Oct. 2023 – Oct. 2024
VIT Bhopal <i>Bachelor of Technology in Computer Science</i>	India Jun. 2018 – Jun. 2022

LEADERSHIP & CAMPUS INVOLVEMENT

Model United Nations (VITB-MUN) <i>Registration Head</i>	Bhopal, India
- Facilitated in-person engagement and managed check-in operations for a diverse population of 500+ attendees at a large-scale university conference. - Collaborated cross-functionally with event teams to execute program logistics, manage multiple priorities, and swiftly resolve unexpected logistical hardships. - Served as a trusted peer and primary point of contact, building rapport and providing 1:1 guidance, outreach, and continuous support to ensure a positive participant experience.	

EXPERIENCE

Designare Solutions Pvt Ltd <i>Full Stack Developer</i>	Mumbai, India March 2022 – August 2025
- Designed and implemented user-centric digital interfaces for platforms including Lyfsum and Stay Leisurely, prioritizing intuitive user experiences and accessible design. - Compiled and analyzed system data to generate actionable reports, ensuring accurate record-keeping and supporting data-driven decision-making for stakeholders. - Facilitated technical troubleshooting and provided direct, 1:1 support for end-users, translating complex concepts into accessible guidance to resolve unexpected hardships.	

PROJECTS

Space Invaders Game Engine (SE546) <i>C#, Azul Engine</i> - Built a Space Invaders game and custom engine in C#, implementing collision detection, sprite rendering, and modular gameplay systems. - Applied comprehensive software design patterns to support a maintainable, organized, and extensible architecture, ensuring the continuous development of project materials.
Matrix-Themed Digital OS Portfolio <i>Next.js, React</i> "Designed and developed a highly interactive, custom digital portfolio functioning as a web-based operating system, demonstrating advanced UI/UX and digital design capabilities. "Managed the end-to-end project lifecycle for the version 2.0 launch, prioritizing tasks, meeting strict development deadlines, and maintaining organized asset files.
AI Journal OS <i>React, TypeScript, Rust, Tauri, gRPC</i> - Built a privacy-first AI journaling application using Rust, Tauri, React, and TypeScript. - Designed a privacy-first local architecture that redacts sensitive information and utilizes encrypted SQLite storage, demonstrating a strict commitment to data security and user confidentiality.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Rust, Java, Kotlin, C#
Technologies: React, Node.js, Tauri, Google Cloud, Docker, GitHub, Unity, PyTorch, TensorFlow
Skills: Technical Troubleshooting, Customer Service, Event Coordination, Project Management
