PROFESSIONAL SUMMARY

Master of Science in Computer Science student at DePaul University with 3 years of professional software development experience. Skilled in technical troubleshooting, customer support, event coordination, and collaborative problem-solving within technology-focused environments.

EDUCATION

DePaul University <i>Master of Science in Computer Science</i>	Chicago, IL Sept. 2025 – Present
BITS Pilani, WILP <i>Postgraduate Certificate in AI/ML</i>	India Oct. 2023 – Oct. 2024
VIT Bhopal <i>Bachelor of Technology in Computer Science</i>	India Jun. 2018 – Jun. 2022

LEADERSHIP & CAMPUS INVOLVEMENT

Model United Nations (VITB-MUN) <i>Registration Head</i>	Bhopal, India
- Managed attendee registration and check-in operations for a large university conference. - Coordinated with event teams to prepare venues and resolve logistical issues. - Served as a primary point of contact for participants, providing guidance and support throughout the event.	

EXPERIENCE

Designare Solutions Pvt Ltd <i>Full Stack Developer</i>	Mumbai, India March 2022 – August 2025
- Developed and maintained full-stack applications using React, Node.js, Python, and cloud technologies in a collaborative team environment. - Worked directly with stakeholders to understand requirements, communicate technical concepts, and deliver reliable solutions. - Supported cloud-hosted systems and contributed to maintaining 99.9% application availability.	

PROJECTS

Space Invaders Game Engine (SE546) <i>C#, Azul Engine</i>
- Built a Space Invaders game and custom engine in C#, implementing collision detection, sprite rendering, and modular gameplay systems. - Applied software design patterns to support maintainable and extensible game architecture.
Interactive Game Development Session <i>Unity</i>
Participated in an intensive Unity game development session during undergraduate studies, gaining hands-on experience with game scene construction, physics components, and interactive environments.
AI Journal OS <i>React, TypeScript, Rust, Tauri, gRPC</i>
- Built a privacy-first AI journaling application using Rust, Tauri, React, and TypeScript. - Designed a local AI pipeline that redacts sensitive information before sending requests to cloud-based models.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Rust, Java, Kotlin, C#
Technologies: React, Node.js, Tauri, Google Cloud, Docker, GitHub, Unity, PyTorch, TensorFlow
Skills: Technical Troubleshooting, Customer Service, Event Coordination, Project Management
