EDUCATION

DePaul University

Master of Science in Computer Science

Chicago, IL

Sept. 2025 – June. 2027

- Coursework: Distributed Systems, Applied Algorithms and Structures, DBMS, Real-Time System Architecture

BITS Pilani, WILP

Postgraduate Certificate in AI/ML

India

Oct. 2023 – Oct. 2024

- Coursework: Deep Learning, Neural Networks, Text Mining, Feature Engineering, Unsupervised Learning

VIT Bhopal

Bachelor of Technology in Computer Science

India

Jun. 2018 – Jun. 2022

- Coursework: Data Structures, Algorithms, DBMS, Operating Systems, Computer Architecture, Soft Computing, Computer Networks, Theory of Computation & Compiler Design

EXPERIENCE

Designare Solutions Pvt Ltd

Full Stack Developer

Mumbai, India

March 2022 – August 2025

- Engineered and deployed a diverse portfolio of full-stack applications, including **Geospatial (GIS)**, **Social Media (Mobile)**, and **Booking** platforms using React, Node.js, Python, and Kotlin.
- Architected scalable REST and **Distributed APIs**, optimizing complex spatial and relational queries to achieve a consistent **25% reduction in data retrieval latency** across enterprise platforms
- Managed cloud-native infrastructure on **Google Cloud Platform (GCP)**, implementing **Cron-driven automation** for data synchronization and maintaining **99.9% uptime** for high-traffic services.
- Integrated advanced behavioral analytics (Amplitude/Google Analytics) and implemented enterprise-grade security protocols, including **Firebase Authentication** and **Role-Based Access Control (RBAC)**

PROJECTS

Deepstory (Social Media Platform) | Kotlin/Android, PostgreSQL, GCP, Firebase, Amplitude

- Developed a short-form video app with **Clean Architecture**, creating APIs for streaming, likes, and profiles.
- Engineered backend synchronization using **Cron jobs** for periodic updates of likes, views, and comments.
- Integrated **Amplitude** for behavior analytics to drive UI/UX improvements and engagement tracking.

Space Invaders Game Engine | C#, Azul Engine, GoF Patterns

- Architected a C# engine implementing **14+ GoF design patterns** and **SOLID principles**
- Eliminated runtime heap allocation via an **Object Pool** system and used **Proxy/Flyweight** for sprite rendering.
- Implemented a decoupled collision system using **Visitor and Observer** patterns with double-dispatch.

IQGeo (Telecom/GIS Platform) | Python, JavaScript, React

- Developed backend APIs and React modules to visualize large geospatial datasets, translating client requirements into technical specifications.
- Architected scalable Python (Pyramid) APIs to handle complex spatial queries, improving data retrieval efficiency for telecom clients.

Leisurely (Booking Platform) | React, GCP, TypeScript, PostgreSQL

- Built a high-performance React application and a custom CMS for property management, optimizing data-driven operational workflows.
- Designed REST APIs and database schemas that reduced query latency by 25% while maintaining 99.9% uptime on GCP
- Integrated Google Analytics to capture user events, utilizing "what/when" data insights to improve platform engagement.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C#, Kotlin

Frameworks/Tools: React, Node.js, GCP, Firebase, Android, Docker, Amplitude, PyTorch

Databases: PostgreSQL, MySQL, Oracle
